

Ittai Ben-Porath is an Associate Professor at the Hebrew University Faculty of Medicine, which he joined in 2007. He obtained his Ph.D. at the Hebrew University, and performed postdoctoral research under the instruction of Dr. Robert A. Weinberg, studying cancer biology. Research in the Ben-Porath laboratory is focused on two main topics: 1. The roles of cellular senescence in cancer and aging. 2. Regulation of differentiation states and malignancy in breast cancer.
